

# Non linear editor Plugins

- Export into Gemiso MAM from NLE menu
- Timeline to media rendering into production/broadcasting formats
- Adding/Writing metadata when users export media to MAM

- Gemiso Ariel MAM/Proxima TNPS provides the most intuitive and easiest way to integrate the other production systems.
- To register/send media to Gemiso MAM, the export plugin is provided. Installation of the plugin lets NLE systems have a new menu to register media from the NLE.
- The plugins for NLE systems are available for the following software; Adobe Premiere, Apple Final Cut Pro 7 and GrassValley Edius.
- Using media from Ariel MAM on your NLE is simpler. Just drag&drop the media to your NLE bin or timeline. The special featured HTML5 browser is available for drag&drop.
